SUMMARY

Software Engineer and AI Developer with hands-on experience building production-ready AI applications, REST APIs, and backend systems using Python, FastAPI, Spring Boot, and LLM-powered workflows. Experienced in Retrieval-Augmented Generation (RAG), API development, AI/ML integration, backend optimization, and deploying intelligent applications.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, TypeScript, SQL, C++

Backend: FastAPI, Spring Boot, REST APIs, API Testing, Node.js, Express.js

Databases: PostgreSQL, MongoDB Atlas, MongoDB, SQLite

AI / ML: AI/ML, Generative AI, LLMs, Retrieval-Augmented Generation (RAG), LangChain, Prompt Engineering, Google Embeddings, ChromaDB, Semantic Search, Dense Retrieval, Document Intelligence

Frontend: Next.js, React.js, HTML, CSS

Tools: Git, GitHub, Vercel, Render

Core Skills: Data Structures and Algorithms, Problem Solving, Authentication, API Design, Client-Server Architecture

EXPERIENCE

Software Development Intern – NYX Analitica

Dec 2025 – Mar 2026

- Developed and evaluated Python-based backend workflows using FastAPI and Spring Boot across banking document-processing systems.
- Performed REST API validation, API testing, backend debugging, and workflow optimization.
- Worked with PostgreSQL databases for data validation and backend processing.
- Contributed to Retrieval-Augmented Generation (RAG) applications using Python, embeddings, and LLM-powered pipelines.

Full Stack Development Intern – Blackbuck Engineers Pvt. Ltd.

Jul 2024 – Sep 2024

- Built web applications using React.js, Node.js, and REST APIs following modern full-stack development practices.
- Integrated frontend interfaces with backend services using client-server architecture principles.
- Performed debugging, testing, and performance improvements across application modules.

PROJECTS

CareerPilot Agent (github.com/NaveenTechist/career-pilot-agent)*

- Developed an AI-powered career assistant that analyzes resumes, matches them against job descriptions, and generates ATS-optimized resume recommendations using LLM-powered workflows.
- Engineered an end-to-end backend pipeline with FastAPI, modular AI agents, prompt engineering, PDF text extraction, resume parsing, and structured JSON validation.
- Implemented AI-driven resume analysis, keyword optimization, and job-specific resume customization to streamline the application process for software engineering roles.

AI Travel Planner (<https://github.com/NaveenTechist/ai-travel-planner>)

- Designed and deployed an AI-powered travel planning platform using Python, Next.js, Express.js, MongoDB Atlas, REST APIs, and Gemini AI.
- Implemented JWT authentication, middleware validation, protected routes, and secure user-specific trip management.
- Integrated itinerary generation, budget estimation, hotel recommendations, and packing assistance through AI-driven workflows.

OKPDF – Hybrid RAG Platform (okpdf.vercel.app)

- Engineered a document productivity platform featuring 18+ PDF utilities and a Retrieval-Augmented Generation chatbot.
- Built FastAPI, LangChain, Google Embeddings, ChromaDB, semantic retrieval, dense vector search, and knowledge retrieval pipelines.
- Built Python-based FastAPI services integrating LangChain, Google Embeddings, ChromaDB, and Retrieval-Augmented Generation (RAG) workflows.

EDUCATION

B.Tech in Information Technology

2023–2026

Dhanekula Institute of Engineering and Technology, Vijayawada (CGPA: 7.2)

Diploma in Metallurgical Engineering

2017–2021

Government Polytechnic, Vijayawada (CGPA: 6.0)
