SUMMARY

- Entry-level **Software Development Engineer** with hands-on experience building scalable applications using **Java, Spring Boot, React, and RESTful APIs**.
- Strong foundation in **Data Structures, Algorithms, and Object-Oriented Design**, with a focus on writing clean, efficient code.

TECHNICAL SKILLS

Languages: Java, Python, C++

Frontend: HTML, CSS, Bootstrap, JavaScript, React.js

Backend: Spring Boot, Node.js, Express.js

Databases: SQLite, MongoDB (Basics)

Developer Tools: Git, GitHub, VS Code, IntelliJ IDEA, Cursor

Design & Visualization Tools: Figma, Power BI

EXPERIENCE

Software Development Intern – NYX Analitica

Dec 2025 – Mar 2026

- Designing and developing **scalable backend services** for banking and MIS platforms used in institutional reporting (e.g., NABARD).
- Implementing **RESTful APIs** using **Java and Spring Boot**, following clean architecture and OOP principles.
- Building responsive frontend components using **React (TypeScript)** and integrating them with backend services.
- Managing **PostgreSQL** transactional data, optimizing queries, and ensuring data consistency across backend services.
- Collaborating in an **agile development environment**, contributing to code reviews, debugging, and iterative feature delivery.

Full Stack Development Intern – Blackbuck Engineers Pvt. Ltd.

Jul 2024 – Sep 2024

Completed an 8-week internship with IIDT & APSCHE, gaining hands-on experience in full-stack development, REST API integration, version control, and deployment workflows.

PROJECTS

Spring Boot to FastAPI Migration (github.com/NaveenTechist/springboot-to-fastapi-migration-)

Migrated backend **REST APIs** from **Spring Boot (Java)** to **FastAPI (Python)** focusing on performance optimization. Benchmarked API performance on a large dataset (lakhs of records) and achieved **34.9% faster response time**.

Local RAG Bot (github.com/NaveenTechist/local-rag-bot)

Built a secure **Retrieval-Augmented Generation (RAG)** pipeline to generate answers from documents using an **LLM**. Designed for unstructured data retrieval and contextual response generation.

Data Analysis Dashboard (Power BI) (drive.google.com/drive/folders/1zx38fwa5HeW1-PwJZ-emxWcNDWc3w21r)

Developed an interactive **Power BI dashboard** analyzing **2065+ records**, creating visualizations, KPIs, and insights for data-driven decision making.

DSA Practice Repository (github.com/NaveenTechist/DSA-Practice)

Solved **Data Structures and Algorithms** problems using **C++ and Java**, covering arrays, recursion, sorting, and time-space complexity optimization.

EDUCATION

B.Tech in Information Technology

2023–2026

Dhanekula Institute of Engineering and Technology, Vijayawada (CGPA: 7.2)

Diploma in Metallurgical Engineering

2017–2021

Government Polytechnic, Vijayawada (CGPA: 6.0)

Secondary School Certificate (SSC)

2013–2017

ASNRA Z.P.H. School, Vijayawada (CGPA: 7.3)

CERTIFICATIONS & WORKSHOPS

AI/ML Fundamentals | AWS Cloud Computing Basics | UI/UX Design with Figma | Power BI Data Analysis

ACHIEVEMENTS

Maintained a 870+ day continuous coding streak, demonstrating ownership, consistency, and long-term commitment to software engineering excellence.
